## EDUCATION:

### Bachelor of Science in Mathematics (Honors)

- University of Delhi, New Delhi, India

May 2023

## SKILLS:

**Analytical Tools:** Power BI, Advanced Excel, Tableau, matplotlib

**Programming Languages:** Python, R, HTML, CSS

**Database:** MySQL

## EXPERIENCE:

### Data Analyst Intern | AI Variant

[ Jun 2023 – Jan 2023]

- Enhanced data quality through data cleaning and resulting in a 25% improvement in data quality.
- Created charts, graphs, and tables to represent data findings effectively.
- Collaborated with cross-functional teams to deliver data-driven insights.

### Data Analyst Intern | Meri SKILL

- Assisted in creating automated reporting systems to improve efficiency, improving report preparation efficiency by 30%.
- Played a key role in implementing data cleaning and data normalization best practices.

## PROJECTS EXPERIENCE:

### Marketing Insights – Food and Beverage industry [SQL | Power BI]

[ Jun 2023]

- Developed a comprehensive Pizza Sales Report, providing insights into the dynamic quick-service restaurant industry, with a focus on sales performance and competitive analysis.
- Used data-driven decisions and recommendations based on the insights derived from the dashboard, resulting in a 20% increase in data-directed decision-making.

### Executive Management -- Consumer Goods - [Power BI | SQL]

[ Aug 2023]

- Uncovered insights for 10 Ad-Hoc Business Questions by Querying a Dataset using SQL in MYSQL Workbench
- Insights from my presentation have the potential to significantly reduce overall operational costs by approximately 10 % .

### Manufacturing Report - [Excel | Pivot Table | Power Query]

[ Oct 2023]

- Generated a comprehensive Manufacturing Analysis report for Adventure Works Cycles, applying advanced Excel features for detailed insights into strategic decision-making.
- Implemented advanced Excel functions for real-time data visualization, resulting in a 15% improvement in production output.

### Fraud Detection - Credit Card Complaints – [Tableau]

[ Nov 2023]

- Developed interactive dashboards to monitor and analyze credit card complaint data, improving decision-making and reducing resolution times by 20%.
- Collaborated cross-functionally to integrate Tableau visualizations into daily operations, providing real-time monitoring of credit card complaint metrics.

## ACHIEVEMENTS:

- IBM Data Visualization Certificate
- Data Analyst Certificate by ExcelR
- Data Analysis Fundamentals by Udacity and Tech up
-
